

Healthier Lives for All Americans Through Discovery *National Institutes of Health in the 2011 Budget*

The National Institutes of Health (NIH) supports the discovery of knowledge and therapies that will lead to better health outcomes for all Americans. NIH accomplishes this goal through a robust program of intramural and extramural research, education, and training conducted or sponsored by 27 Institutes and Centers.

The 2011 Budget provides \$32.1 billion in appropriations for NIH (see Table), an increase of \$1.0 billion or 3.2 percent above the 2010 enacted level. The 2011 Budget continues to support biomedical research across a broad range of scientific and health opportunities. Investments will focus on five strategic priorities with great promise: applying genomics and other high-throughput technologies; translating basic science discoveries into new and better treatments and diagnostics; using science to enable health care reform; global health; and reinvigorating and empowering the biomedical research community. NIH will also continue to award and oversee the \$10.4 billion provided in the Recovery Act. The Administration remains committed to alleviating the impact of cancer and has retooled the initiative to focus on specific scientific advances in the short, medium and long term.

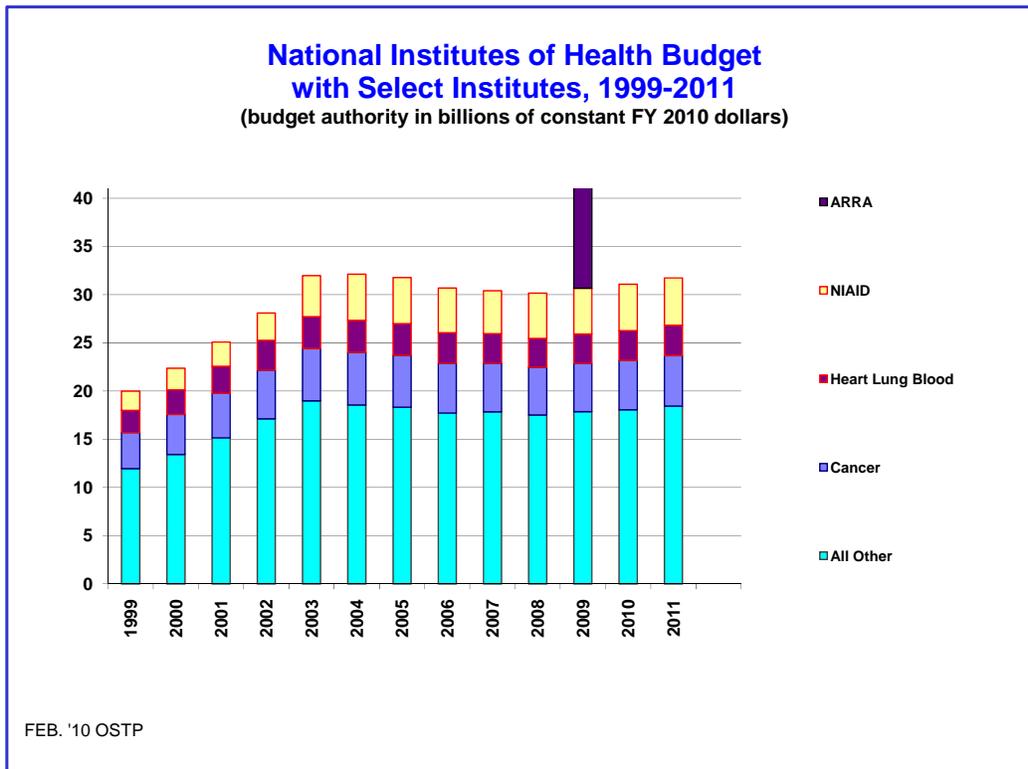

Figure 1.

In 2011, the NIH Common Fund (CF) will invest \$562 million, an increase of \$18 million over 2010, to support cross-cutting, trans-NIH programs that require participation by at least two NIH Institutes or Centers (ICs) or that would otherwise benefit from strategic planning and coordination (see Table). Elsewhere within the Department of Health and Human Services (HHS), the 2011 Budget accelerates the development of new medicines, vaccines, and diagnostics for biodefense by investing \$476 million in Advanced Research and Development, \$171 million more than the 2010 enacted level. The Agency for Healthcare Research and Quality (AHRQ) receives \$286 million in the 2011 Budget for patient-centered health research.

<i>NIH Common Fund (included above)</i>	<i>541</i>	<i>0</i>	<i>544</i>	562	18	3.2%

1/ Allocations of Recovery Act (P.L. 111-5) appropriations.

2/ Excludes mandatory funds for diabetes.

3/ Includes transfers to Global Fund.

4/ Includes separate appropriations for Superfund-related activities.

5/ Trans-NIH initiatives (Common Fund) are consolidated in OD.

All years include comparable adjustments for trans-NIH financing of public access operations and information resources.

OSTP - February 1, 2010
